

Deftan AI

Leading the way online forex
trading

ENTER THE WORLD OF
OPPORTUNITY

ABOUT US

PROUD TO BE THE 1 WORLD'S LEADING FOREX TRADING PLATFORM

Deftan AI is a leading Online Forex Trading company with an impeccable track record in meeting investors' needs. Our seamless integration is backed by experienced traders and technologists who prioritize client services. As a member, you'll join a peer-to-peer banking, trading, and currency exchange system. Our trading approach focuses on short-term strategies, specifically day trading, ensuring safety by avoiding overnight risks. Experience secure and controlled trades with Deftan AI.

What we Offer

TECHNICAL ANALYSIS

Find Fault with a man who chooses to annoying consequences

FUNDAMENTAL ANALYSIS

Great Explorer of Truth the master builder human happiness

SENTIMENT ANALYSIS

Tationally encount consequences that again is there anyone

WHY WITH US

REASON FOR CHOOSE Deftan AI

FRIENDLY & EXPERT# 1

We put our faith in our people therefore we encourage to share ideas without the judgments.

24/7 SUPPORT# 2

We provide fast response to customer and always available to guide how to trade

SMART INVESTMENT# 3

Next2Fx offers a variety of comprehensive and competitive benefit programs to meet your needs.

TRANSPARENCY# 4

Not just competitive but also honest, our prices are shown along with the complete break-up of services

WHAT IS A FOREX TRADING BOT OR ROBOT?

A forex trading bot or robot is the colloquial term for a software program based on foreign exchange market price movements that signals traders to buy or sell a currency pair at a given point in time. Forex trading robots are automated software programs used to generate trading signals in FX markets. Forex robots are designed to remove the psychological element of trading, which can be detrimental. While forex trading robots advertise the prospect of profits, it is important to remember that they are limited in their capabilities and not foolproof.

LET'S UNDERSTAND FOREX TRADING ROBOTS

Forex trading robots are automated software programs that generate trading signals. Most of these robots are built with MetaTrader, using the MQL scripting language, which lets traders generate trading signals or place orders, and manage trades.

Forex robots are designed to remove trading's psychological element, which can be detrimental. Automated forex trading robots are available for purchase over the internet, but traders should exercise caution when buying a trading system this way. Oftentimes, companies will spring up overnight to sell trading systems with a money-back guarantee before disappearing a few weeks later. They may cherry-pick successful trades as the most likely outcome for a trade or use curve-fitting to generate great results when backtesting a system, but these are not legitimate systems for assessing risk and opportunity.

HOW DOES A FOREX TRADING BOT WORK?

A forex trading robot, or bot, can be programmed to trade constantly, 24 hours a day, seven days a week. However, allowing this level of ongoing trading potentially removes the investor from the process. Many investors may prefer to be more.

WHAT ARE CRYPTO TRADING BOTS AND HOW DO THEY WORK?

Crypto trading bots are invaluable tools for professional traders looking to execute algorithmic trading strategies in the crypto markets. But they also come with risks!

Cryptocurrency trading happens round-the-clock, making it challenging to seize all market opportunities, even for

the most experienced traders. Therefore, experienced crypto traders often turn to crypto trading bots to

compensate for these limitations, using algorithmic trading programs to auto-execute their trading strategies

on their behalf.

DECENTRALIZED SYSTEM

A decentralized organization is an organization that uses a transparent computer program or platform and electronically predetermined rules to automate decisions and facilitate transactions without any central authority. Decentralization offers an organizational structure where the decision making delegates to the middle or lower subordinates from the top management.

DECENTRALIZATION IN BLOCK CHAIN

In Block chain, decentralization refers to the transfer of control and decision-making from a centralized entity (individual, organization, or group thereof) to a distributed network. Decentralized networks strive to reduce the level of trust that participants must place in one another, and deter their ability to exert authority or control over one another in ways

WHAT IS Decentralized Finance?

DeFi is short for "decentralized finance," an umbrella term for a variety of financial applications in cryptocurrency or blockchain geared. DeFi draws inspiration from blockchain, the technology behind the digital currency bitcoin, which allows several entities to hold a copy of a history of transactions, meaning it isn't controlled by a single, central source. That's important because centralized systems and human gatekeepers can limit the speed and sophistication of transactions while offering users less direct control over their money. DeFi is distinct because it expands the use of blockchain from simple value transfer to more complex financial use cases.

CRYPTO CURRENCY

A cryptocurrency or crypto is a digital currency designed to work as a medium of exchange through a computer network that is not reliant on any central authority, such as a government or bank, to uphold or maintain it. It is a decentralized system for verifying that the parties to a transaction have the money they claim to have, laminating the need for traditional intermediaries, such as banks, when funds are being transferred between two entities. Cryptocurrency does not exist in physical form (like paper money) and is typically not issued by a central authority. Cryptocurrencies typically use decentralized control as opposed to a central bank digital currency (CBDC).

CRYPTO TRADING

Crypto and trading are the words that are being used by the individuals of every age group. The technology used in the development has made it more secure and safe. We have made a mindset to provide a never ending income opportunity to the talented and deserving individuals of the country. We are planning to launch our project at the global level so that we can unite various countries through a single payment method. Moreover, we have decided to Use some part of our profit in social welfare and environment conservation.

ROAD MAP

The use of crypto-currencies has become more widespread, and they are now increasingly accepted as a legitimate currency for transactions.
